LANGUAGES

English ----- Intermediate (B1).

Spanish (Native).

EDUCATION

**FACULTAD DE INGENIERÍA
MECÁNICA Y ELÉCTRICA
(UANL)**

- Ingeniería en Tecnología de Software | 2022-Actualidad.

CERTIFICATIONS

- Certified by CISCO
CCNAv7: Introduction to Networks.
- Certified by CISCO
CCNA: Fundamentos de
Conmutación, Enrutamiento y
Redes Inalámbricas.

PROFILE

I am a Software Technology Engineering student currently in my eighth semester, with experience in computer architecture, web development, and computer tools related to design and programming. I am capable of quickly understanding new concepts.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, JavaScript, TypeScript.
- **Frontend:** React, Next.js, Vue.js, Quasar Framework, HTML5, CSS3.
- **Databases:** PostgreSQL, SQLite, SharePoint Lists.
- **Low-Code & Business Intelligence:** Microsoft Power Apps, Domo.
- **Development Tools:** Git, GitHub, Visual Studio Code, Arduino IDE.
- **AI-Assisted Development:** Claude, Gemini, GitHub Copilot, Cursor.
- **Design & Multimedia:** Adobe Photoshop, Canva, Filmora.
- **Hardware:** Computer Hardware Maintenance.

SOFT SKILLS

- Problem-solving and analytical thinking.
- Adaptability and teamwork.
- Fast learning.
- Time Management.

EXPERIENCE
DENSO MÉXICO (DNMX)
QUALITY DIGITALIZATION INTERN
(November 2025-June 2026)

- Built responsive web applications using Vue.js, Quasar Framework, TypeScript, JavaScript, HTML, and CSS to digitize manual processes within the Quality Planning department.
- Automated business workflows using Microsoft Power Apps with SharePoint Lists as the backend database, reducing manual work and improving process efficiency.
- Designed and maintained Domo dashboards using manufacturing data from PLC systems, enabling real-time monitoring and reporting for production processes.
- Developed applications using the Arduino IDE to collect input data for robotic systems and implement robot head movement control for digitalization projects.
- Developed and optimized PostgreSQL databases to support internal digitalization applications.
- Used Git for version control and collaborative development across software projects.
- Gathered requirements and collaborated with internal stakeholders through meetings to analyze manual processes and design digital solutions.
- Created technical documentation and user manuals for completed applications to support deployment, maintenance, and end-user adoption.
- Collaborated with QA and Quality Planning teams to deliver software solutions and support digital transformation initiatives across the department.
